

SCREW CLAMPING SUPPORT KIDS

- Fatigue resistance and high clamping force ; the clamping beamis made with high rigidity steel , which is forged and hardened through heattreatment.
- The screw clamping frame is forged with special sreel, precision processed, heat hardened, and precision groud, providing highly stable clamping support; with three stage height adjustment,can be overlapped for higher height variation
- Our screw clamping support machanism is a must for CNC machining center as well as boring and milling machines
